VIEWS! VIEWS!!
Those leaving the country, be it for a
short time, or otherwise, should not fail to
take with them a few good views of town
and camp and for that purpose should pay
a visit to the

Photographic Warehouse
Where they will find a collection of over
TWO HUNDRED and FIFTY
to choose from

Also a very interesting series of views
and types of UPPER PERU including Lake
TITICACA, the TEMPLE of the SUN and
TOMB of the INCAS.
Also views of the grand falls of the Y-
GUAZU, second only to Niagara.

TELEGRAMS
(By Haves Agency)

Rome, 11th.—Father Cerechi, of the
order of Jesuits, died yesterday at an
advanced age.

Madrid, 11th.—State of siege at Bilbao was relaxed
yesterday by decree of Government.

London, 11th.—The Anglo African
Treaty has been ratified by the Por-
tuguese Senate.

Asuncion, 11th.—The Argentine
Minister, Mr. Ramon Mendoza, was
officially received to-day. Speeches were
very cordial.

Montevideo, 11th.—The idea of a Col-
lege of Lawyers is on the tapis.
Mr. Henry Estrada has been named
Consultor in Liverpool.

The Pontifical decorations of the
Order of Saint Gregory were yesterday
handed to Drs. Requena, Baud, Dard,
Garcia Santos and Galliani by the new
Bishop.

The Centenario and Saturno have this
evening for Buenos Ayres.

A GREAT EXPERIMENT.
The Senators of Congress with slight
heart have passed a bill for suspending
payment of all bills and obligations in
gold or currency for 6 months. They
give no reason why the term of 5 years
was not preferred, as in the case of the
Provincial Bank, but they insert in the
law a most cruel provision that this sus-
pension should be considered without effect
on earth, as we supposed to be pay-
ment, if nobody is to pay anybody, as
dictated by the Law?

Congress has undertaken to stop the
clock for 182 days till the end of the
year. The crisis will still go marching
on, and complications of the impossible
character are inevitable. The whole
mechanism of society will be thrown into
to tremendous confusion, and at the
close of 6 months things will be in a far
worse condition than to-day. It would
have been simpler for Congress to issue
a decree of "tabula rasa," whereby all
debts should be considered wiped out, and
each debtor paying 10 per cent. of what
he owes, and then all to start afresh.

An experiment such as Congress pro-
poses is one that cannot be viewed with-
out trembling. It is like the earthquake
of Mendoza in its effects on commerce.
The ground opens under our feet, and
society is staggered by the convulsion.
Anybody a month ago had predicted
that the collective wisdom of Congress
should devise such a remedy for the
crisis he would have been sent to the
concealment for a lunatic. But the
progress of the crisis has so far un-
dermined men's intellects that we see
every day the wildest schemes ad-
vanced by persons who really believe
they are consulting the public welfare.
In fact it is impossible to say what
they will do next, and we can only
wonder what the next move of Congress
will be.

It would seem that each day serves to
bring calamities upon us, for this law is
harmless than it was last December.
What troubles may await us in the next
six months is more than anyone dare
venture to predict, and our condition in
December 1891 must be even worse than
it is to-day.

The public has been fooled for the
last six years by the flattering promises
of those persons called Optimists, who
on all occasions took a cheerful view
of the situation, and assured us that
things would be much less disastrous
than a general bankruptcy for six
months. During the past six months
we have seen many troubles, and our
condition to-day is much more de-
pressed than it was last December.

"If in other parts of the world infected
persons were to be put in the same
place as the infected persons in Buenos
Ayres, the result would be the same."
The public will receive with grati-
tude any statement calculated to throw
light on the affairs of the bank, but the
figures furnished in the foregoing state-
ment are not exactly what is wanted. There
is a prevalent opinion, right or wrong,
that the bank has been very badly man-
aged, and the story of the clandestine
issues of paper-money is not yet for-
gotten. What makes matters worse is
the new regulation that a debtor may
not acquire himself by means of checks
against money held by the bank further
than 50 per cent. of his debt. This is
really too bad.

THE NEW MORATORIUM.
The following is the text of the Bill
just passed by the Senate:
Art. 1.—All engagements to pay sums
of money at sight, expired or about to
expire, shall be considered as postponed
from the promulgation of this law for a
term of six months in each case, it being
understood that this postponement can
not be extended further than the first
of March, 1892.

Art. 2.—The payment of national, pro-
vincial or municipal taxes does not come
under the foregoing article.
Art. 3.—The Board of the National
Mortgage Bank are hereby authorized to
receive, meantime, in payment of the
service which the debtors of the Bank
should have paid in gold, Cédulas of
the respective service, for the full
nominal value for the purposes of amorti-
zation, in the same form and payment
of interest to Cédula holders who may
accept this form of payment.

Art. 4.—Let this be communicated.

THE CHILIAN REVOLUTION.
The news wired yesterday from Chile
was as usual of a more graphic descrip-
tion. A telegram was received from the
Chilian government stating that the
torpedoes attacked Pisagua on
Tuesday, but were easily repulsed by the
artillery on shore. Hostilities are evi-
dently about to take a practical form,
and we may add on the authority of the
Debate and Andes of Mendoza that 300
Chilian officers and soldiers left the
city recently to cross the Andes, Col-
onel, who took such a part in the
Government side, in the recent
engagements in Iquique and Pisagua, is
at present staying in Mendoza, in the
company of San Juan, a large number
of war material of Chilian soldiers
transit has been deposited by the com-
manders of the men.

On Wednesday the Chilian Chambers
received a message and Bill from the
President Balmaceda for the alteration of
the Constitution. H. E. desires to effect
such changes as will prevent the out-
break of any conflict between the powers
of the State.

Major Bustos, of the Stephen Divi-
sion, arrived on Tuesday evening at the
foot of the Andes at the head of 200
men, and a few hours subsequently was
defeated by Col. Zaldívar and Cortes and
their men, making quite a formidable
detachment, although it is difficult to see
what the Government intends doing
at the foot of the Andes with so many
armies. In the meantime, it is gen-
erally admitted that the Imperial has made
an error in the North and succeeded in
landing two more battalions, 700 men
in all.

UNWHOLESOME MILK.
A CAUSE OF TYPHOID FEVER.
We note in a recent issue of the
Provincial Bank, a case of typhoid
fever. The article is from the pen of
Dr. Davison, who has already a claim
public gratitude for having so frequently
called attention to the danger of dipht-
heria and other prevalent diseases in this
unhealthy city. If four readers look
over the monthly report of the Munici-
pality, they will find that the Lord
Mayor looks his eye on the number of
"ambros" of the city, but the report only
shows the number of "ambros" found to
be "in a bad condition." Dr. Davison
supplies a deal of useful information,
and the principal of the report is that
we shall proceed to lay before our
readers a summary of his article.

"It may not be generally known that
the milk of a cow is a cause of typhoid
fever. In England, where the
milk of the cow is always sold in
this unhealthy city. If four readers look
over the monthly report of the Munici-
pality, they will find that the Lord
Mayor looks his eye on the number of
"ambros" of the city, but the report only
shows the number of "ambros" found to
be "in a bad condition." Dr. Davison

this unhealthy city. If four readers look
over the monthly report of the Munici-
pality, they will find that the Lord
Mayor looks his eye on the number of
"ambros" of the city, but the report only
shows the number of "ambros" found to
be "in a bad condition." Dr. Davison
supplies a deal of useful information,
and the principal of the report is that
we shall proceed to lay before our
readers a summary of his article.

"It may not be generally known that
the milk of a cow is a cause of typhoid
fever. In England, where the
milk of the cow is always sold in
this unhealthy city. If four readers look
over the monthly report of the Munici-
pality, they will find that the Lord
Mayor looks his eye on the number of
"ambros" of the city, but the report only
shows the number of "ambros" found to
be "in a bad condition." Dr. Davison
supplies a deal of useful information,
and the principal of the report is that

ing a long shot up the field the Calde-
nium gatekeeper was called upon to de-
fend his post, but through not having
had much work to do previous, managed
to carry the ball to far under the bar,
thus giving the Railway their only goal,
and nothing further being scored the
Caldeonians won by four to one.

THE SECRETARY OF THE Caldeonians Club
will be pleased to arrange matches with
any other Secretary either with the first
or second team for the following dates
in this month, 21st, 24th and 28th.

W. Westwood,
Hon. Secretary.

THE IRISH CATHOLIC ASSOCIATION.
IN AGT. WITH PATRICK HAN, TREASURER.
